Referred to:

February 8, 2011

A BILL TO BE ENTITLED

AN ACT TO ALLOW THE USE OF RISK-BASED REMEDIATION TO ACCELERATE
 THE CLEANUP OF CONTAMINATED INDUSTRIAL SITES FOR THE PURPOSE OF
 LIMITING HUMAN AND ENVIRONMENTAL EXPOSURE TO SAFE LEVELS, TO
 PROTECT CURRENT AND LIKELY FUTURE USES OF GROUNDWATER, AND TO
 ENSURE THE COST-EFFECTIVE APPLICATION OF LIMITED PUBLIC AND
 PRIVATE RESOURCES.

8 Whereas, the General Assembly finds that public health, safety, and welfare and the 9 environment can be protected by implementing a remediation process that requires that 10 contaminated industrial sites be cleaned up to a level that is sufficient to ensure protection of 11 public health, safety, and welfare and the environment without excessive expenditure of public 12 or private resources; and

Whereas, the General Assembly finds that there are contaminated industrial sites in North Carolina, including land and other property, surface water, and groundwater, that are adversely affected by environmental contamination due to the presence of drilling waste; hazardous and toxic materials, substances, and wastes; solid waste; oil; and other wastes, contaminants, and regulated substances; and

Whereas, the General Assembly finds that the presence of environmental
 contamination on industrial sites creates both potential and actual harm to public health, safety,
 and welfare and to the environment; and

Whereas, the General Assembly finds that this potential and actual harm results in substantial economic losses, including reduced property values and tax revenues, decreased ability to develop and expand the beneficial use of these sites, and other opportunity costs because of the uncertainties and concerns that result from the environmental contamination of these sites; and

Whereas, the General Assembly finds that it is in the public interest that contaminated industrial sites are cleaned up or managed in a manner that protects public health, safety, and welfare and the environment and protects groundwater that is a current or probable future water supply; and

Whereas, the General Assembly finds that North Carolina has numerous and varied State-managed remediation programs to address environmental contamination, including the Inactive Hazardous Sites Response Act of 1987; the hazardous waste management program administered by the State pursuant to the federal Resource Conservation and Recovery Act of 1976; the Leaking Petroleum Underground Storage Tank Cleanup Act of 1988; the Brownfields

4

General Assembly Of North Carolina

Property Reuse Act of 1997; the Dry-Cleaning Solvent Cleanup Act of 1997; the federal 1 2 Superfund program administered in part by the State pursuant to the Comprehensive 3 Environmental Response, Compensation, and Liability Act of 1980 and the Superfund 4 Amendments and Reauthorization Act of 1986; and the groundwater protection rules adopted 5 by the Environmental Management Commission; and Whereas, the General Assembly finds that the expenditure of public and private 6 7 resources on unnecessary remediation could better be channeled to other purposes, including 8 new development, renovation and repair, research and development, training and education, 9 and other activities that maintain and enhance North Carolina's competitive position in the 10 world and the excellent quality of life enjoyed by the citizens of North Carolina; and 11 Whereas, the General Assembly finds that North Carolina's groundwater is a 12 valuable public and private resource, serving as the drinking water source for one-half of the 13 State's population and also as a water supply for industrial and commercial uses; and 14 Whereas, the General Assembly finds that maintenance of North Carolina's surface 15 water and groundwater resources will become increasingly important to the continued economic vitality of the State in the future; and 16 17 Whereas, the General Assembly finds that use of site-specific remediation standards 18 based on an objective, scientific, and uniform approach to the evaluation of the risk posed by 19 each contaminated site can be protective of public health, safety, and welfare and the 20 environment: and 21 Whereas, the General Assembly finds that use of site-specific remediation standards 22 in appropriate circumstances may encourage accelerated cleanup of contaminated industrial 23 sites: and 24 Whereas, the General Assembly intends that the levels of remediation that are 25 established for each contaminated site are to be applicable or relevant under federal remediation 26 programs; and 27 Whereas, the General Assembly intends that the protections afforded to public 28 health, safety, and welfare and to the environment by existing environmental, health, and safety 29 standards that apply to ongoing activities not be diminished in any way, in order that those 30 standards will continue to protect against the discharge or release of contaminants to the 31 environment that would result in additional contaminated sites; Now, therefore, 32 The General Assembly of North Carolina enacts: 33 SECTION 1. G.S. 130A-310.62 through G.S. 130A-310.64 are reserved for future 34 codification purposes. 35 **SECTION 2.** Article 9 of Chapter 130A of the General Statutes is amended by 36 adding a new Part to read: "Part 8. Risk-Based Environmental Remediation of Industrial Sites. 37 38 "§ 130A-310.65. Definitions. 39 As used in this Part: 40 "Background standard" means the naturally occurring concentration of a (1)41 substance in the absence of the release of a contaminant. 42 "Commission" means the Environmental Management Commission created (2)pursuant to G.S. 143B-282. 43 44 "Contaminant" means any substance regulated under any program listed in (3) 45 G.S. 130A-310.67(a). "Contaminated industrial site" or "site" means any real property that meets 46 (4) all of the following criteria: 47 48 The property is contaminated and may be subject to remediation a. 49 under any of the programs or requirements set out in G.S. 130A-310.67(a). 50

	General Assemb	ly Of North Carolina	Session 2011
l		b. The property is or has been used primarily for man	ufacturing or other
		industrial activities for the production of a comme	rcial product. This
		includes a property used primarily for the generation	on of electricity.

General Assembly Of North Carolina

1		son who proposes to conduct remediation pursuant to this Part shall submit a
2		gation report to the Department prior to submitting a remedial action plan. The
3		gation report shall include, but is not limited to, a legal description of the
4		ite; a map showing the location of the site; a description of the contaminants
5		eir concentration in the media of the site; a narrative description of the
6 7		ed in the investigation; a description of all on-site releases of contamination; a
7 8		n to scale, showing benchmarks, directional arrow, location of property
		dings, structures, all perennial and nonperennial surface water features,
9 10		dense vegetation, contaminant spill or disposal areas, underground utilities,
10		and existing on-site wells; identification of adjacent property owners and
11 12		es; description of local geologic and hydrologic conditions; an evaluation of the
		properties for the existence of environmentally sensitive areas; a description
13 14		nonitoring well design and installation procedures; a map, drawn to scale, that
		dwater sample locations; a description of field and laboratory quality control
15	· · ·	rance procedures followed during the remedial investigation; a description of
16 17		manage investigation-derived wastes; tabulation of analytical results for all
17 18		s of all laboratory reports; a description of procedures and the results of any
18 19		ents; and any other information required by the Department or considered nvestigator. The remedial investigation shall assess all contaminated areas of
20		g types and levels of contamination, and the risk that the contamination poses
20 21		safety, and welfare and to the environment.
21	-	rson who proposes to conduct remediation pursuant to this Part shall develop
23		poposed remedial action plan to the Department. A remedial action plan shall
23 24		rotection of public health, safety, and welfare and the environment. A remedial
25		do all of the following:
26	<u>(1)</u>	<u>Identify actions required to remove, treat, or otherwise appropriately</u>
27	(1)	mitigate or isolate the source of contamination to ensure that the source will
28		not cause unrestricted use standards to be exceeded in any medium.
29	<u>(2)</u>	Address contamination that moves from one medium to another in order to
30	<u></u>	prevent a violation of the remediation standards established under
31		G.S. 130A-310.68. A more stringent remediation standard may be required
32		for a particular medium to control impact on other media.
33	<u>(3)</u>	Identify the current and anticipated future uses of property comprising the
34		contaminated site and address any concerns raised in public comment on the
35		proposed remedial action plan as to the proposed future uses of the property.
36	<u>(4)</u>	Identify the current and anticipated future uses of groundwater in the
37		contaminated site and address any concerns raised in public comment on the
38		proposed remedial action plan as to the future uses of groundwater.
39	<u>(5)</u>	Determine the appropriate method of remediation to achieve the site-specific
40		remediation standards.
41	<u>(6)</u>	Specify any measures that may be necessary to prevent adverse effects to the
42		environment that may occur at levels of contamination that are lower than
43		the standard necessary to protect human health.
44	<u>(7)</u>	Specify any measures that may be necessary to prevent any discharge into
45		surface waters during implementation of the remedial action plan that
46		violates applicable surface water quality standards adopted by the
47		Commission.
48	<u>(8)</u>	Specify any measures that may be necessary to prevent any air emission
49		during implementation of the remedial action plan that violates applicable air
50		quality standards adopted by the Commission.

	<u>(9)</u>	Provide for attainment and maintenance of the remediation standards established under G.S. 130A-310.68.
		established under G.S. 130A-310.68.
	(10)	Provide for methods and procedures to verify that the quantity,
	<u>(= =)</u>	concentration, range, or other measure of each contaminant remaining at the
		contaminated site at the conclusion of the contaminant-reduction phase of
		remediation meets the remediation standards established for the site, that an
		acceptable level of risk has been achieved, and that no further remediation is
		required.
	(11)	Provide for the imposition and recordation of land-use restrictions as
	<u> </u>	provided in G.S. 143B-279.9, 143B-279.10, 130A-310.3(f), 130A-310.8,
		130A-310.35, 143-215.84(f), and 143-215.85A if the remedial action plan
		allows contamination in excess of the greater of unrestricted use standards or
		background standards to remain on any real property or in groundwater that
		underlies any real property.
	(12)	Provide for submission of an annual certification to the Department by the
	<u> </u>	property owner that land use at the site is in compliance with land-use
		restrictions recorded pursuant to this Part and that the land-use restrictions
		are still properly recorded in the chain of title for the property.
	(13)	Provide a detailed description of the proposed remedial action to be taken;
	<u> </u>	the results of any treatability studies and additional site characterization
		needed to support the proposed remedial action; plans for postremedial and
		confirmatory sampling; a project schedule; a schedule for progress reports to
		• • •
	(14)	Provide a description of measures that will be employed to ensure that the
		safety and health of persons on properties in the vicinity of the site and
		persons visiting or doing business on the site will not be adversely affected
		by any remediation activity.
	<u>(15)</u>	Provide a reasonable estimate of the probable cost of the remedial action
		sufficient for the Department to determine an acceptable level of financial
		assurance.
	(16)	Provide proof of financial assurance as required by G.S. 130A-310.72.
<u>(c)</u>	A ren	nedial action plan shall also include an analysis of each of the following
factors:		
	<u>(1)</u>	Long-term risks and effectiveness of the proposed remediation, including an
		evaluation of all of the following:
		a. The magnitude of risks remaining after completion of the
		remediation.
		b. The type, degree, frequency, and duration of any postremediation
		activity that may be required, including, but not limited to, operation
		and maintenance, monitoring, inspection, reports, and other activities
		necessary to protect public health, safety, and welfare and the
		environment.
		c. Potential for exposure of human and environmental receptors to
		contaminants remaining at the site.
		d. Long-term reliability of any engineering and voluntary institutional
		controls, including repair, maintenance, or replacement of
		<u>components.</u>
	(15) (16) <u>A ren</u>	 safety and health of persons on properties in the vicinity of the site persons visiting or doing business on the site will not be adversely affeed by any remediation activity. Provide a reasonable estimate of the probable cost of the remedial a sufficient for the Department to determine an acceptable level of fina assurance. Provide proof of financial assurance as required by G.S. 130A-310.72. nedial action plan shall also include an analysis of each of the follo Long-term risks and effectiveness of the proposed remediation, includine evaluation of all of the following: a. The magnitude of risks remaining after completion of remediation. b. The type, degree, frequency, and duration of any postremedia activity that may be required, including, but not limited to, oper and maintenance, monitoring, inspection, reports, and other activing necessary to protect public health, safety, and welfare and environment. c. Potential for exposure of human and environmental recepto contaminants remaining at the site. d. Long-term reliability of any engineering and voluntary institut controls, including repair, maintenance, or replacement components.

	bly Of North Carolina Session 2011
<u>(2)</u>	Toxicity, mobility, and volume of contaminants, including the amount of
	contaminants that will be removed, contained, treated, or destroyed; the
	degree of expected reduction in toxicity, mobility, and volume; and the type,
	quantity, toxicity, and mobility of contaminants that will remain after
	implementation of the remedial action plan.
<u>(3)</u>	Short-term risks and effectiveness of the remediation, including the
	short-term risks that may be posed to the community, workers, or the
	environment during implementation of the remedial action plan, and the
	effectiveness and reliability of protective measures to address short-term
	risks.
<u>(4)</u>	The ease or difficulty of implementing the remedial action plan, including
	commercially available remedial measures; expected operational reliability;
	available capacity and location of needed treatment, storage, and disposal
	services for wastes; time to initiate remediation; and approvals necessary to
	implement the remediation.
(d) The d	development of a remedial action plan may require supplemental submissions
	used on Department review, remedial action pilot studies, and public comment
	rnment and citizens.
	. Notice of intent to remediate.
	to the public participation requirements of the individual programs listed in
	67(a), the person who proposes to remediate a site under this Part shall send a
	to remediate to all local governments having taxing or land-use jurisdiction
	d to all adjoining landowners. The notice shall include all of the information
	. 130A-310.69(a) and include a statement of intent to clean up the site to
· · · ·	nediation standards. The person shall submit to the Department a copy of the
-	provided to local governments and adjoining landowners, a certification that the
notice of intent	t to remediate was so provided to those parties, and all information and
comments that th	he person received in response to the notice. In addition, the person shall, when
appropriate, desc	cribe how the remedial action plan was modified to address comments received
in response to the	e notice.
" <u>§ 130A-310.71.</u>	. Review and approval of proposed remedial action plans.
(a) The	Department shall review and approve a proposed remedial action plan
	the remediation standards set out in G.S. 130A-310.68 and the procedures set
consistent with t	
	on. In its review of a proposed remedial action plan, the Department shall do all

General Assembly Of North Carolina Session 2011 Administrative Code. Proof of financial assurance shall be provided in the remedial action plan 1 2 and annually thereafter on the anniversary date of the approval of the plan. 3 "§ 130A-310.73. Attainment of the remediation standards. 4 Compliance with the approved remediation standards is attained for a site or portion (a) 5 of a site when a remedial action plan approved by the Department has been implemented and 6 applicable soil, groundwater, surface water, and air emission standards have been attained. The 7 remediation standards may be attained through a combination of remediation activities that can 8 include treatment, removal, engineering, or institutional controls, except that the person 9 conducting the remediation may not demonstrate attainment of an unrestricted use standard or a 10 background standard through the use of institutional controls alone. When the remedial action plan has been fully implemented, the person conducting the remediation shall submit a final 11 12 report to the Department, with notice to all local governments with taxing and land-use 13 jurisdiction over the site, that demonstrates that the remedial action plan has been fully 14 implemented, that any land-use restrictions have been certified on an annual basis, and that the 15 remediation standards have been attained. The final report shall be accompanied by a request that the Department issue a determination that no further remediation beyond that specified in 16 17 the approved remedial action plan is required. 18 (b) The person conducting the remediation has the burden of demonstrating that the 19 remedial action plan has been fully implemented and that the remediation standards have been 20 attained in compliance with the requirements of this Part. The Department may require a person 21 who implements the remedial action plan to supply any additional information necessary for 22 the Department to determine whether the remediation standards have been attained. 23 The Department shall review the final report, and, upon determining that the person (c) 24 conducting the remediation has completed remediation to the approved remediation standard 25 and met all the requirements of the approved remedial action plan, the Department shall issue a 26 determination that no further remediation beyond that specified in the approved remedial action 27 plan is required at the site. Once the Department has issued a no further action determination, 28 the Department may require additional remedial action by the responsible party only upon 29 finding any of the following: 30 Monitoring, testing, or analysis of the site subsequent to the issuance of the (1)31 no further action determination indicates that the remediation standards and 32 objectives were not achieved or are not being maintained. 33 One or more of the conditions, restrictions, or limitations imposed on the site (2)34 as part of the remediation have been violated. 35 Site monitoring or operation and maintenance activities that are required as <u>(3)</u> 36 part of the remedial action plan or no further action determination for the site 37 are not adequately funded or are not adequately implemented. 38 A contaminant or hazardous substance release is discovered at the site that (4) 39 was not the subject of the remedial investigation report or the remedial 40 action plan. 41 (5) A material change in the facts known to the Department at the time the 42 written no further action determination was issued, or new facts, cause the 43 Department to find that further assessment or remediation is necessary to 44 prevent a significant risk to human health and safety or to the environment. 45 The no further action determination was based on fraud, misrepresentation, (6)46 or intentional nondisclosure of information by the person conducting the 47 remediation. 48 (7) Installation or use of wells would induce the flow of contaminated 49 groundwater off the site. 50 The Department shall issue a final decision on a request for a determination that (d) 51 remediation has been completed to approved standards and that no further remediation beyond

	General Assemb	ly Of North Carolina	Session 2011

7	General Statutes.	-	-
8	"§ 130A-310.74.	Compliance with other laws.	
9		is covered by an agreement under the Brownfields Prope	erty Reuse Act of
10	1997, as codified	1 as Part 5 of Article 9 of Chapter 130A of the General S	statutes, any work
11	performed by the	e prospective developer pursuant to that agreement is not re	equired to comply
12		ut any work not covered by such agreement and perform	
13	another person no	ot a party to that agreement may be performed pursuant to the	is Part.
14	_	Use of registered environmental consultants.	
15		ent may approve the use of a registered environmental con	sultant to provide
16	·	assessment and remediation of a site under this Part. If reme	*
17	Part is not unde	rtaken voluntarily, the Department may not require the us	se of a registered
18		onsultant to provide oversight for the assessment and rem	-
19	under this Part.		
20		Fees; permissible uses of fees.	
21		rson who undertakes remediation of environmental con	tamination under
22	····	ediation standards as provided in G.S. 130A-310.68 shall pay	
23		al to four thousand five hundred dollars (\$4,500) for each ac	
24		nation, including any area that will become contaminated	
25		, no person shall be required to pay more than one hu	
26	thousand dollars	(\$125,000) to the Fund for any individual site, regardless	s of its size. This
27	one-time fee sha	all be payable at the time the person undertaking remedi	ation submits the
28	remedial action p	lan to the Department.	
29	(b) Funds	collected pursuant to subsection (a) of this section may be	used only for the
30	following purpos	es:	-
31	(1)	To pay for administrative and operating expenses necess	sary to implement
32		this Part.	• •
33	(2)	To establish, administer, and maintain a system for the tra	acking of land-use
34		restrictions recorded at sites that are remediated pursuant to	o this Part.
35	" <u>§ 130A-310.77.</u>	Construction of Part.	
36	This Part sha	Il not be construed or implemented in any of the following w	ays:
37	<u>(1)</u>	In any manner that would jeopardize federal authorization	under any of the
38		federal statutes, programs, or requirements set out in G.S.	130A-310.67(a) or
39		would otherwise conflict with federal authority under	er those statutes,
40		programs, and requirements. This Part is supplemental to	the programs and
41		requirements set out in G.S. 130A-310.67(a) that would	otherwise govern
42		the remediation of a contaminated industrial site. When	_
43		provisions, or requirements of this Part conflict with	the definitions,
44		provisions, or requirements of an otherwise applicable rem	ediation program,
45		this Part shall control, unless expressly stated to the contrar	y.
46	<u>(2)</u>	To limit the authority of the Department to require in	
47		response, or remediation of environmental contamination	-
48		provision of State or federal law necessary to address an i	
49		public health, safety, or welfare or the environment.	

General Assemb	oly Of North Carolina	Session 2011
<u>(3)</u>	To alter the requirements of programs to prevent or mitig	gate the release or
	discharge of contaminants to the environment, inc	luding permitting
	requirements that regulate the handling of hazardous subst	ances or wastes.
<u>(4)</u>	To supersede or otherwise affect or prevent the enforcement	ent of any land-use
	or development regulation or ordinance adopted by a mus	nicipality pursuant
	to Article 19 of Chapter 160A of the General Statutes or ad	dopted by a county
	pursuant to Article 18 of Chapter 153A of the General Sta	tutes. The use of a
	site and any land-use restrictions imposed as part of a restrictions	medial action plan
	shall comply with land-use and development contro	ols adopted by a
	municipality pursuant to Article 19 of Chapter 160A of th	e General Statutes
	or adopted by a county pursuant to Article 18 of Cha	apter 153A of the
	General Statutes."	
SECT	FION 3. G.S. 130A-310.78 through G.S. 130A-310.80 are	reserved for future
codification purp	oses.	
SECT	FION 4. G.S. 130A-310.10(a) reads as rewritten:	
"(a) The S	Secretary shall report on inactive hazardous sites to the	Joint Legislative
Commission on	Governmental Operations, the Environmental Review Con	mmission, and the
Fiscal Research	Division on or before 1 October of each year. The repo	rt shall include at
least:least the fol	lowing:	
(1)	The Inactive Hazardous Waste Sites Priority List; List.	
(2)	A list of remedial action plans requiring State funding th	rough the Inactive
	Hazardous Sites Cleanup Fund; Fund.	
(3)	A comprehensive budget to implement these remedial ac	tion plans and the
	adequacy of the Inactive Hazardous Sites Cleanup Fund t	
	said plans;plans.	
(4)	A prioritized list of sites that are eligible for reme	dial action under
	CERCLA/SARA together with recommended remedial a	action plans and a
	comprehensive budget to implement such plans.	The budget for
	implementing a remedial action plan under CERCLA/SA	RA shall include a
	statement as to any appropriation that may be necessary	to pay the State's
	share of such plan; plan.	
(5)	A list of sites and remedial action plans undergoing volume	ntary cleanup with
	Departmental approval; approval.	
(6)	A list of sites and remedial action plans that may requir	e State funding, a
	comprehensive budget if implementation of these possib	le remedial action
	plans is required, and the adequacy of the Inactive Hazard	lous Sites Cleanup
	Fund to fund the possible costs of said plans; plans.	
(7)	A list of sites that pose an imminent hazard;hazard.	
(8)	A comprehensive budget to develop and implement remed	ial action plans for
	sites that pose imminent hazards and that may require Stat	te funding, and the
	adequacy of the Inactive Hazardous Sites Cleanup Fund; a	ndFund.
<u>(8a)</u>	The amounts and sources of funds collected by year	ar received under
	G.S. 130A-310.76, the amounts and sources of those fu	inds paid into the
	Inactive Hazardous Sites Cleanup Fund establish	
	G.S. 130A-310.11, the number of acres of contamination	n for which funds
	have been received pursuant to G.S. 130A-310.76, and	
	accounting of how the funds collected pursuant to G.S.	
	been utilized by the Department to advance the purposes of	
	9 of Chapter 130A of the General Statutes.

	Environmental Review Commission."	-

General Assembly Of North Carolina

SECTION 5. The Secretary of Environment and Natural Resources shall make all 1 2 reasonable efforts to obtain a written agreement from the United States Environmental 3 Protection Agency that Part 8 of Article 9 of Chapter 130A of the General Statutes, as enacted 4 by Section 2 of this act, is consistent with the Comprehensive Environmental Response, 5 Compensation, and Liability Act of 1980, Public Law 96-510, 94 Stat. 2767, 42 U.S.C. § 9601, 6 et seq., as amended, and the Superfund Amendments and Reauthorization Act of 1986, Public 7 Law 99-499, 100 Stat. 1613, as amended. 8 **SECTION 6.** G.S. 143-215.104M(f) reads as rewritten: 9 (Repealed effective January 1, 2012 - See notes) Notice of "§ 143-215.104M. 10 Dry-Cleaning Solvent Remediation; land-use restrictions in deeds. 11 12 (f) Enforcement. – Any restriction on the current or future use of property subject to a 13 Notice of Dry-Cleaning Solvent Remediation filed pursuant to this section shall be enforced by 14 any owner of the property or by any other potentially responsible party. Any land-use restriction may also be enforced by the Commission through the remedies provided in this Part 15 or by means of a civil action in the superior court. The Commission may enforce any land-use 16 17 restriction without first having exhausted any available administrative remedies. Restrictions 18 also may be enforced by any unit of local government having jurisdiction over any part of the 19 property by means of a civil action without the unit of local government having first exhausted 20 any available administrative remedy. A land-use restriction may also be enforced by any person 21 eligible for liability protection under this Part who will lose liability protection if the land-use 22 restriction is violated. A restriction shall not be declared unenforceable due to lack of privity of 23 estate or contract, due to lack of benefit to particular land, or due to lack of privity of any 24 property interest in particular land. Any person who owns or leases a property subject to a 25 land-use restriction under this section shall abide by the land-use restriction. Failure to submit 26 an annual certification that land-use restrictions are properly recorded and followed shall result 27 in a notice from the Commission to the property owner. The notice shall inform the person of 28 the actions that need to be taken in order for the person to come into compliance and specify a 29 date by which the person must comply, which shall not be less than 30 calendar days from the 30 date the notice is mailed. Any person who fails to comply within the time specified shall then 31 be subject to enforcement procedures as provided in this Part." 32 SECTION 7. The Environmental Review Commission, with the assistance of the

SECTION 7. The Environmental Review Commission, with the assistance of the Department of Environment and Natural Resources, shall study the cost of assessing and remediating inactive hazardous substance or waste disposal sites for which there is no financially viable responsible party. The Commission shall also identify potential sources of funds to address the projected need for assessment and remediation. The Environmental Review Commission shall report its findings and recommendations, including any legislative proposals, to the 2012 General Assembly upon its convening.

39

SECTION 8. This act is effective when it becomes law.
